

High Point Outpatient

Youth & Young Adult
Co-occurring Disorders

Urgent Care Program

For individuals (age 16-25) with mental health and substance use disorder concerns. They receive a same-day comprehensive treatment assessment and referrals to community-based services.

Clients can “walk in” during urgent care days and times to meet with a clinician and receive treatment referrals for both their mental health and substance use disorder concerns.

Clients and families are eligible for the service if they live in Southeastern Massachusetts. High Point will bill your insurance company for clinical treatment, or the funding will be provided by the Department of Public Health.
